# INTRODUCTION

It all began with the concept of combining virtual reality with the physical world. The Ethaverse is a thrilling new digital world where anyone can participate and spend time, and it will become one of the largest industries in human history in the future. The creative potential that could be realized. It is a place where people can do anything in their own unique manner, just as they can in the actual world.

EthaWorld is the most essential component of our endeavor. Our multipurpose MetaVerse will deliver immense user value, especially to our \$ETHA token and Etha Apes NFT holders. Users can socialize, explore, shop, play, exchange tokens, participate in new projects, and take advantage of AI technology's opportunities. The most thrilling and valuable feature of our EthaWorld is the ability to perform anything on a single virtual-world platform.

Socializing is an essential part of the Ethaverse. In a virtual environment, users can connect with friends and other people and chat, exchange media, and participate in events. Regardless of their physical location, this offers a new platform for people to meet and interact with one another. Users benefit from increased privacy and security thanks to the decentralized nature of the Ethaverse because their private data is kept on a blockchain and secured by cryptographic algorithms.

The most important component of our endeavor is the EthaWorld. Significant user value will be offered by our multipurpose MetaVerse, especially to holders of our \$ETHA token and Etha Apes NFT. Users can engage in new projects, socialize, explore, shop, play, trade tokens, and more while taking advantage of the opportunities provided by AI technology. The convenience of being able to perform anything you might need on a single virtual world platform is the most exciting and useful aspect of our EthaWorld.

We are building an entire Web3 ecosystem with a dedicated Metaverse. Our first \$ETHA token buyers will get a chance, allowing them to receive a series of free NFTs. The \$ETHA token and Etha Apes NFTs will enable buyers to access the entire "Ethaverse" Ecosystem.

# VISION

Our goal is to responsibly coordinate people, value, ownership, and character in order to contribute to the development of a decentralized, community-oriented financial system. Ethaverse will create an ecosystem to raise the worth of your assets. We have much bigger goals than just creating a Metaverse initiative.

Ethaverse is motivated by the idea of increasing its community's participation and contribution. To achieve their goal of being the most well-known All-in-one Metaverse project, the team will make every effort to involve them as much as possible in their work. Community participation in planning, marketing, and other strategic areas will help ensure Ethaverse's long-term viability as a Metaverse platform.

Ethaverse vision is encapsulated with three main components;

## VISION STATEMENT

### Community-Focused

Creating the growth of the Ethaverse community through community-driven initiatives.

### Innovation

To be the world's most all-in-one Metaverse platform

### All in one Ecosystem

Providing single platform for all crypto requirements

# ECOSYSTEM

EthaVerse is our principal focus going forward, and we have been working on it in the distance for a long time. We are happy to say that it will operate on a trustworthy and stable blockchain. When developing ecosystem dynamics, our primary objective was to ensure that all cryptocurrency requirements could be fulfilled on a single platform. After the completion of the necessary integrations, the EthaWorld platform will have everything you could possibly need in the crypto world.

Following are the sections of the EthaVerse ecosystem;

Users' safety and contentment is a top priority for us. Therefore, we will increase the level of security inside our ecosystem to ensure a more stable and secure blockchain. By combining these elements with a powerful warning system, you can ensure rapid response even in a high-traffic location. Our ecosystem will also include Tokens, NFT, and Metaverse assets. Our initial goal is to make sure a secure and efficient exchange of these assets.

# ETHAWORLD

Creating a visual of EthaWorld was the first step in this process. The most valuable and important component of the EthaVerse ecosystem is EthaWorld. You will have access to much more than just a metaverse world with the technology that will one day exist in this world.

Our main aim is to increase the number of individuals in the digital universe, empower them to achieve in the digital realm what they can in the physical world, and enhance global accessibility for all, irrespective of their location. In the EthaWorld, you and your colleagues will have the opportunity to convene, host gatherings, engage in activities, and access the EthaVerse's technological advancements.

One of the most exciting aspects of our platform is the capability to access EthaWorld through VR technology. No matter where you are, you will be able to access EthaWorld by using VR technology with a computer or smartphone.

EthaWorld will feature 5 distinct technologies. EthaSwap, EthaLaunchPad, EthApp, Etha Apes, and EthAI are all important components of our project. We will allocate separate rooms for these technologies. Every technology possesses unique benefits and features. These technologies shall evolve and change, and novel ones shall be incorporated over time. At EthaWorld, we envision a world without borders!

# ETHASWAP

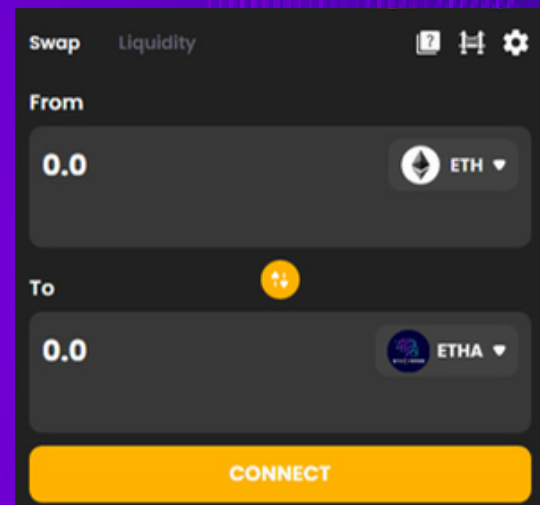

EthaSwap has an easy-to-use interface and advanced trading tools, making it attractive to both novice and experienced traders.

EthaSwap provides the best-in-class user experience through our revolutionary Swap. EthaSwap enables our users to exchange their tokens for any other cryptocurrency without a Centralized Exchange. EthaSwap routes all of your transactions directly through your wallet.

EthaSwap is the decentralized exchange on the Ethereum blockchain network, and it is designed to exchange one token for another directly, bypassing trading platforms and other intermediaries. To carry out exchange operations, the user does not need to create an account on the exchange, go through the KYC procedure and trust their funds to third parties. The user must connect the browser wallet, select the exchange direction, and make a transaction. Next, the smart contract will automatically send the token amount to the user's account.

EthaSwap is an effort to circumvent the performance limitations imposed by smart contract blockchains. It is important to observe that the EthSwap does not support manual token listing. Tokens are routinely listed in a decentralized manner without human intervention. Users can simply convert other cryptocurrencies, such as ETH, USDC, and USDT, into \$ETHA or other coins/tokens, or use credit cards directly.

# ETHALAUNCHPAD

Ethaverse Launchpad helps people to create and launch NFT, gamify, and metaverse initiatives. The creators can boost finances to develop, launch, and sell their projects by using the Ethaverse Launchpad development services. Our main priority is to provide a superior user experience compared to other Launchpads.

We have developed a Launchpad to help aspiring creators in securing funding for their projects. Our involvement in the cryptocurrency industry and interest in the non-fungible tokens (NFT) field led to significant inventions that helped elevate and excel the renowned industry by releasing its full market potential. The success of a technology is contingent on its ability to reach all parts of the world and educate people on how to use it. We designed this initiative to aid creators in creating and selling Tokens or NFTs so that they can capitalize on the revenues and opportunities that token or NFTs afford by having a distinct portfolio for their ideas.

Ethaverse Launchpad is a blockchain-supported platform that bridges the distance between investor-fundraising and the cryptocurrency's decentralized protocol. We intend to connect the globe for borderless transactions in order to fund a new project, while allowing investors to investigate a new token. Using the Ethereum-compliant lift platform, we provide an opportunity for investors to better educate themselves with more global information and less uncertainty. By utilizing cutting-edge Ethereum-based smart contract technology, we will eliminate manual errors and ensure stability, lucidity, and immutability.

The following are some characteristics of the EthaLaunchPad ecosystem:

- **Guaranteed Allocations System**
- **Support for Multiple Chains**
- **Superior safety measures**

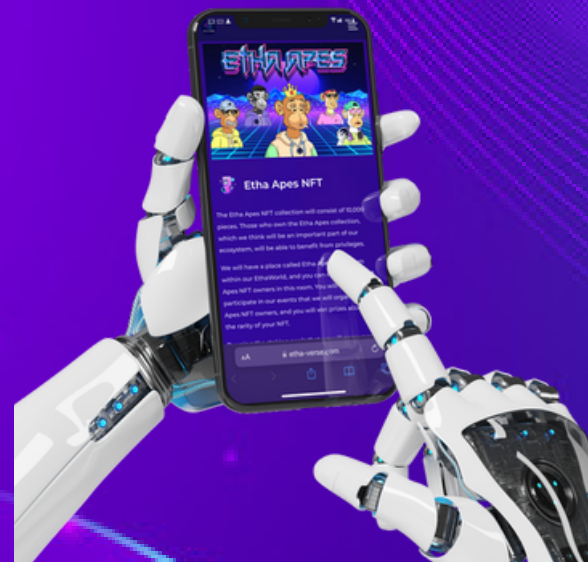

# ETHAPP

EthApp is developed using distributed ledger technology. This includes financial transactions, online marketplaces, and social networks. EthApp is a mobility application that will facilitate fast access to our ecosystem.

EthApp is a mobile application that provides users with access to EthaVerse platform. The app allows users to buy, sell, store, and trade cryptocurrencies such as \$ETHA, Ethereum, USDT or USDC and others. We will develop VR technology that will facilitate easy access to our ecosystem, which is one of the most essential aspects. Additionally, it enables users to manage their \$ETHA wallets, track the value of their investments, and view real-time market data.

EthApp's user-friendly interface allows it to provide multiple services in a singular location. EthApp will facilitate access to our ecosystem for \$ETHA token holders and Etha Apes NFT holders. It will enable users to store and administer their Ethaverse wallets securely. It provides users with market data in real time, such as the value of their investments, price fluctuations, and other pertinent information. It will allow users to try the EthaAI technology using a smartphone and VR glasses. Users of EthaVerse have no limitations! They will enjoy the freedom of mobility and have convenient access to all parts in our ecosystem.

## Multi-Device Support

# ETHA APES NFT COLLECTION

An integral aspect of our ecosystem is the Etha Apes NFTs. The total supply of Etha Apes NFT collection is 10K. Uniqueness and originality are two of the most important aspects of NFTs that set them apart from other asset types and contribute to their high market value.

Etha Apes NFTs let users to interact with one another and the places they visit. Brands can host events and accept NFTs of Etha Apes as payment. As they play, players can earn \$ETHA Token to use toward NFT upgrades. We intend to distribute the Etha Apes NFT to all \$ETHA token holders so that they can experience the benefits of our NFT collection. Those who participate in our pre-sale and possess 5 million \$ETHA tokens prior to DEX listing will therefore receive free Etha Apes NFT.

The \$ETHA token, commonly known as Etha Apes, allows users to buy, sell, and travel between different locations in the Metaverse. To own an Etha Apes NFT is to demonstrate ownership over an original work of digital content. Blockchains are digital distributed ledgers that safely and transparently record transactions. Each individual Etha Ape is a unique creature.

Here are only a few examples:

- Each NFT is one-of-a-kind and cannot be exchanged for another; this distinguishes them from fungible tokens like Bitcoin and Ethereum.
- Ownership: Because NFTs are recorded in a distributed ledger, their ownership and origin can be established with absolute certainty. This makes it simple to determine who the rightful owner of an NFT is and to track its development over time.
- Authenticity: NFTs can be used to verify the authenticity of a digital asset, which helps artists earn money from their work while keeping it safe from theft.
- Flexibility: NFTs are versatile in that they may be used to represent a wide range of digital objects, allowing their developers to put them to a number of different uses.

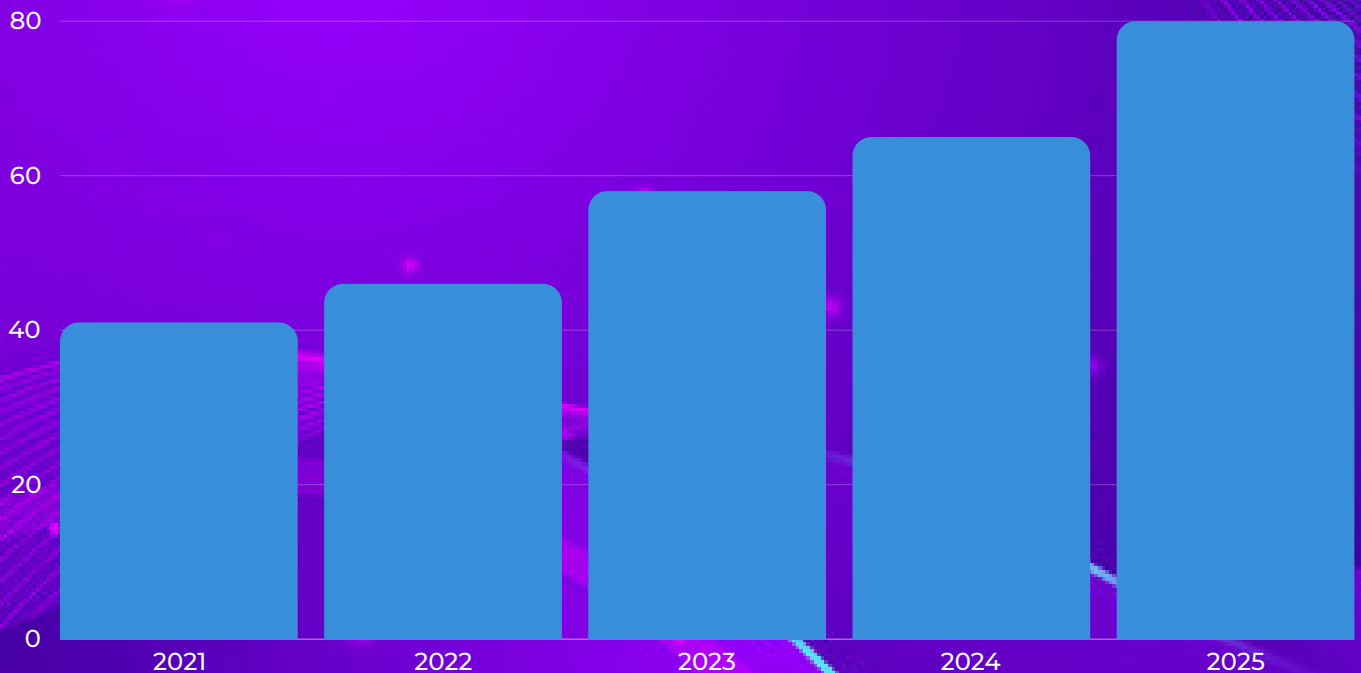

# NFT GLOBAL MARKET OVERVIEW

According to a recent estimate from blockchain analytics firm Chainalysis Inc., about \$41 Billion worth of bitcoin was connected with smart contracts related to NFT markets and collections from the beginning of 2021 until mid-December.

Last year, the popularity of non-fungible tokens (NFTs) skyrocketed, with multimillion-dollar sales and celebrities like musician Shawn Mendes, socialite Paris Hilton, and former first lady Melania Trump are on board.

The NFT market is predicted to expand at least 33% annually, reaching \$80 billion in net sales volume by 2025 and almost \$350 billion by 2030. Though this may appear to be a large amount, we are convinced that the market's real growth will much exceed the investment Jefferies' forecasts.

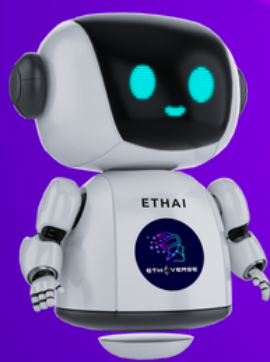

# ETHAI

**Powerful Combination of Cryptocurrency and Artificial Intelligence** The worlds of finance and technology are undergoing rapid transformation. The introduction of digital currencies has increased the globalization, efficiency, and accessibility of financial markets. Now, as artificial intelligence (AI) advances, a more robust ecosystem for digital currencies is emerging. Changing technology and integrating it into the crypto ecosystem is crucial to us, which is why we created the EthAI technology.

Now, AI can assist brokers in analyzing trading trends and making more informed decisions. In addition to these, artificial intelligence can analyze your daily routines and make decisions. With the assistance of artificial intelligence, the EthaVerse ecosystem will be able to make these decisions for you and enable you to utilize the ecosystem's features. We have developed a technology that will allow you to communicate in the world of EthaWorld with the assistance of artificial intelligence. This technology will make your life simpler in the world we will create and will become smarter over time.

Artificial intelligence will be incorporated into all future technologies. For instance, you will be able to trade cryptocurrencies supported by artificial intelligence using AI bots that we will implement into EthaSwap. Within our ecosystem, safety is our top priority, and we will gladly employ artificial intelligence in this regard.

# Why EthaVerse is safer than others ?

Cryptocurrencies have grown in popularity over the past decade because they provide a secure and trustworthy method of transmitting funds without the need for a middleman. Nevertheless, not all cryptocurrencies are created equal, and some projects are better equipped than others to defend against fraud and manipulation.

EthaVerse, which was designed to be a secure, dependable, and decentralized platform for blockchain-based Metaverse and Financial services, stands out among similar initiatives. EthaVerse has implemented multiple safeguards to protect its users and their funds, making it a more secure option than other cryptocurrency initiatives.

Safety is very essential to us, and we assume you feel similarly. The EthaVerse project has completed the 2X KYC and 2X Audit procedures and increased its security level. We are going to use the highest quality cryptographic security systems and work carefully to include our investors in our ecosystem and ensure that they are a part of it.

# Why Should You Choose EthaVerse ?

## FREE FROM THIRD PARTY INTERFERENCE:

Our project eliminates the need for intermediary institutions or developers in the creation of digital assets, resulting in reduced costs as no third party is involved. Furthermore, all transfers between users are executed with speed, eliminating the need for specific authorization and waiting periods.

## INTERCONNECTIVITY

At Ethaverse, we believe in creating an interconnected system based on trust and reliability that is greater than its parts. At Ethaverse, we aim to create an ecosystem that is built by the people, for the people.

## GLOBAL IMPACT

Our goal as a Metaverse project is to ensure that individuals across the globe can seamlessly create assets in EthaVerse without encountering any issues. And our other main aim is to ensure that our project connects individuals worldwide and provides them with the opportunity to be a part of the digital ecosystem and access the EthaVerse.

## TRANSFERABLE

At Ethaverse, we offer a seamless transfer of digital assets between user-to-user without any third-party interference.

# Token Details

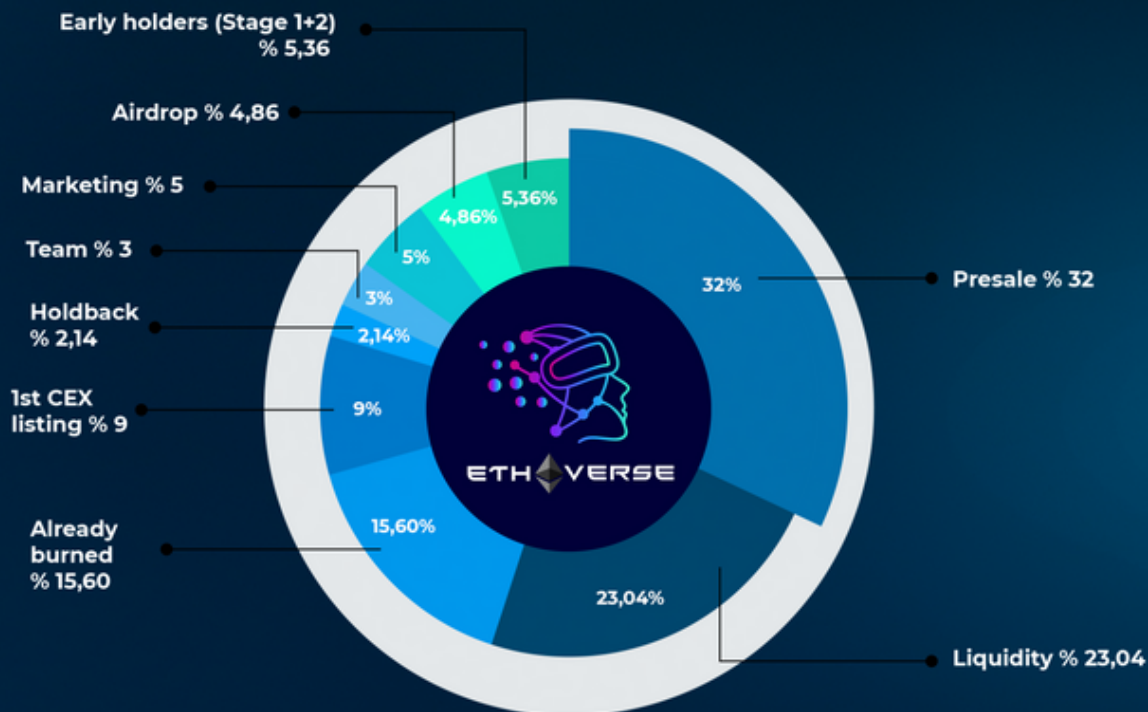

Token Ticker	\$ETHA
Token Name	EthaVerse
Total Supply	10 Billion
Blockchain	ERC-20
Smart Contract	<a href="#">0x2d558eB5fe7F412c3cDccfd72B71082D9126D6dd</a>

## Stages

STAGE 1 <input checked="" type="checkbox"/>	STAGE 2 <input checked="" type="checkbox"/>	PRESALE
<b>Tokens for sale</b> 500.000.000 ETHA	<b>Tokens for sale</b> 1.200.000.000 ETHA	<b>Tokens for sale</b> 3.200.000.000 ETHA
FINISHED (Unsold burned)	FINISHED (Unsold burned)	1 ETH  = 80 M ETHA Total 40 ETH
1 FREE NFT	2 FREE NFT	5 FREE NFT

Note: You will get 5X Etha Apes NFT if you purchase 20M \$ETHA tokens at the Presale

# Token Allocation

**10.000.000.000 \$ETHA**

UPDATED  
29.08.2023

# Token Tax

# Roadmap

- Origin of the Ethaverse idea ✓
- Creating a team ✓
- Preparation for the start of implementation ✓
- Building Website V 1.0 ✓
- Creating Social Media Acc's ✓
- Tokenomics published ✓
- White Paper published ✓
- Creating Smart Contract ✓
- KYC & Audit ✓

2023 Q1

Idea

2023 Q2  
Development

- EthaWorld Beta V 1.0 created ✓
- Building Community ✓
- Listing on voting platforms ✓
- Listing on promoting Platforms ✓
- Etha Apes NFTs created ✓
- Free Etha Apes Campaign (Supply 5K) ✓
- AirDrop V 1.0 ✓
- Stage 1 ✓
- Press Distribution ✓
- 2ND KYC & Audit ✓
- Stage 2 ✓

- Presale (in progress)
- 1st Listing on CEX (TBA)
- Listing on DEX (TBA)
- NFT Minting Page V 2.0
- Etha Apes NFT Whitelist Mint
- AirDrop Prize Distribution
- Aggressive Marketing
- Building Website V 2.0
- Etha Apes NFT Public Mint
- Airdrop V 2.0
- Verified on CMC ✓
- Listing on CG

2024 Q2  
Pre-Sale & Listings

2024 Q3  
Development  
EthaSwap

- Listing Etha Apes on OpenSea
- Preparation for the start of implementation EthaSwap
- Building EthaSwap
- Integrating Limit Order feature
- Integrating EthaSwap into the Ethaverse ecosystem
- Active marketing campaigns, engaging new participants
- Aggressive Marketing
- PR Partnerships

- Tests and integrating EthaWorld into the EthaVerse ecosystem
- Launching the first Beta version of EthaWorld on Windows platform
- Ability to connect to the EthaWorld via VR
- Integrating EthAI technology into the EthaWorld ecosystem
- Ability to move and control with AI technology in EthaWorld
- PR Partnerships
- Grand opening of EthaWorld (Windows)

## 2024 Q4 Development EthaWorld & EthAI

## 2025 Q1 Development EthaLaunchPad

- Preparation for the start of implementation EthaLaunchPad
- Building EthaLaunchPad
- Integrating EthaLaunchPad into the EthaVerse ecosystem
- PR Partnerships
- Press Distribution
- Aggressive Marketing
- Creating events on EthaWorld
- Aggressive Marketing
- 2ND CEX Listing

- Preparation for the start of implementation EthApp
- Building EthApp for IOS and Android platforms
- VR integration for EthApp
- Ability to connect to the EthaWorld via EthApp
- 3RD Listing on CEX
- Easy access to EthaSwap with EthApp
- Easy access to EthaLaunchPad with EthApp
- New Partnerships

## 2025 Q2 Development EthApp

# DISCLAIMER

\$ETHA token (EthaVerse) are not intended as securities in any jurisdiction. Nothing in this White Paper should be treated or read as a guarantee or promise of how EthaVerse business or the tokens will develop or of the utility or value of the tokens. This White Paper outlines current plans, which could change at its discretion, and the success of which will depend on many factors outside \$ETHA token control, including market-based factors and factors within the data and cryptocurrency industries, among others. Any statements about future events are based solely on \$ETHA token analysis of the issues described in this White Paper. That analysis may prove to be incorrect.

By accessing and/or accepting ownership of any information in this White Paper or any portion thereof (as the case may be), you represent and warrant to \$ETHA token that:

You are agree and acknowledge that this White Paper is not a prospectus or offer document of any kind and is not intended to constitute an offer of securities in any jurisdiction or a solicitation for investment in securities and you are not bound to enter into any contract or legal commitment that binding and no cryptocurrency or other form of payment shall be accepted under this White Paper.

You have a basic level of understanding of the operation, functionality, use, storage, transmission mechanisms, and other material characteristics of cryptocurrencies, blockchain-based software systems, cryptocurrency wallets or other related token storage mechanisms, blockchain & smart contract technology and all of the risk associated with it and nobody forced you take certain actions but yourself.

None of the information in this White Paper should be construed as legal, commercial, financial, or tax advice with the \$ETHA token or any of Ethaverse platforms (each as referred to in the White Paper). You should consult legal, financial, tax, or other professional advisors regarding \$ETHA token and its respective businesses and operations of \$ETHA token. You should be aware that you may be required to assume the financial risk of any \$ETHA token for an indefinite time.

You acknowledge and have considered if any of these risks and uncertainties developed into real events, \$ETHA token business, financial condition, results of operations, and prospects could be materially and adversely affected. In such a case, you may lose all or part of the value of the \$ETHA token that you have and take 100 percent responsibility for your own actions.

The Ethaverse team shall not be held liable for any speculative intention by you or from any third parties who attempt to hold \$ETHA token for any other reason.
